Art Unit: 1764

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 37 CFR 1.71 because the recitation at page 2 of "... The object of the present invention is to eliminate this danger by simple means and this is accomplished by providing the device with substantially the characterizing features of subsequent claim 1 ..."

One looks at the specification for interpretation of the languages in the claims and not vice versa. (Underlining supplied).

Claims 2 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claimed "The solvent steam pressure generated ... from lifting of the flexible inner container in the lower space ..." in claims 2 and 9. Compare e.g., with page 2, last paragraph wherein there is no pressure mention. The steam itself is quite different from the steam pressure. However, if support can be pointed-out at least, the specification is objected to as failing to provide proper antecedent basis for the above claimed subject matter as it is not positively recited in the specification. See also the following claimed languages not positively recited in specification: " ... the pipe means being positioned inside the outer container

defining the boiling chamber ..." in claims 2 and 9; and the "flexible inner container being movable into different configuration within the boiling chamber..".

Claims 2-3 and 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. The "pipe means being positioned inside the outer container defining the boiling chamber ..." appears to be inconsistent with the initially recited "a pipe means located between the flexible inner container and the outer container ...". The former recitation appears to be broadening the latter recitation..

b. The term "pure" in claims 2 and 9 is a relative term which renders the claim indefinite. The term "pure" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably appraised of the scope of the invention.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admission in view of Hoover.

The above references are applied for the same combined reasons as set forth at page 4 of the previous Office action, dated 10/30/02, @ paper # 7.

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Applicant's arguments filed April 16, 2003 have been fully considered but they are not persuasive.

Contrary to applicant's contention pipe 102 or pipe 91 are both inside the outer container as shown in Figs 1-3 and 5 of the Hoover's reference.
